First Example

Url of the website: https://www.ojieame.design/

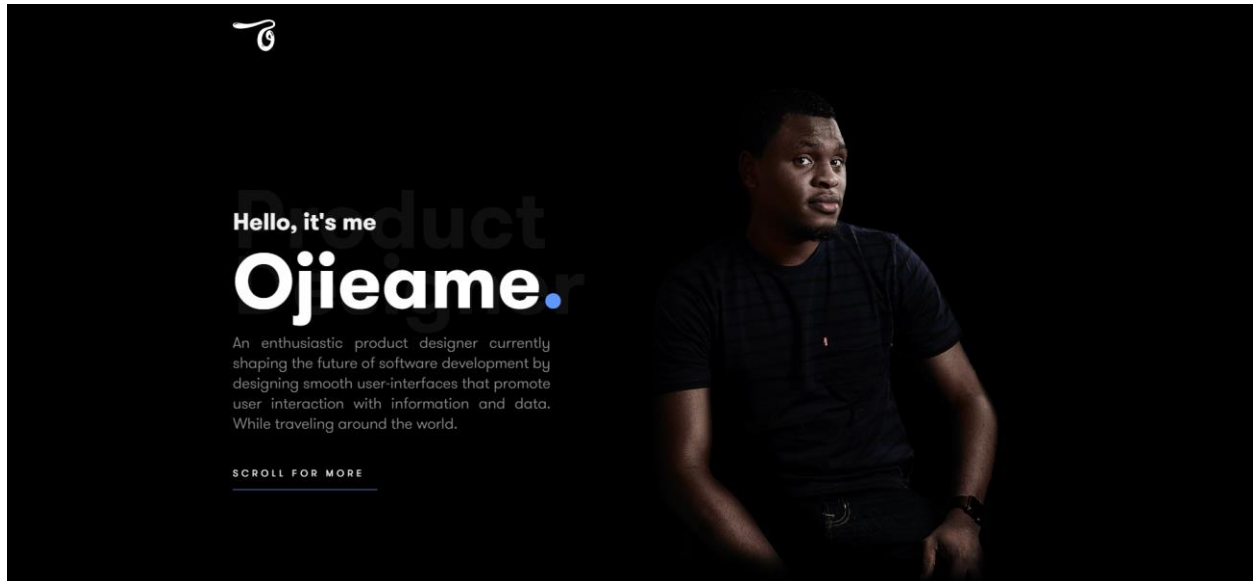

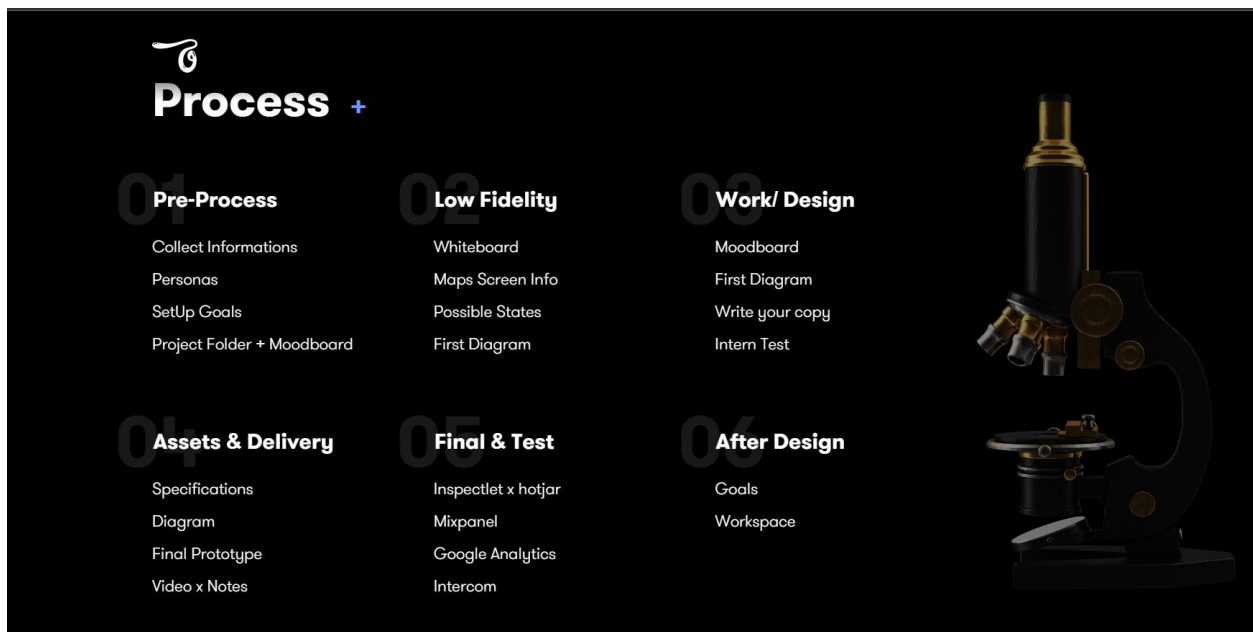

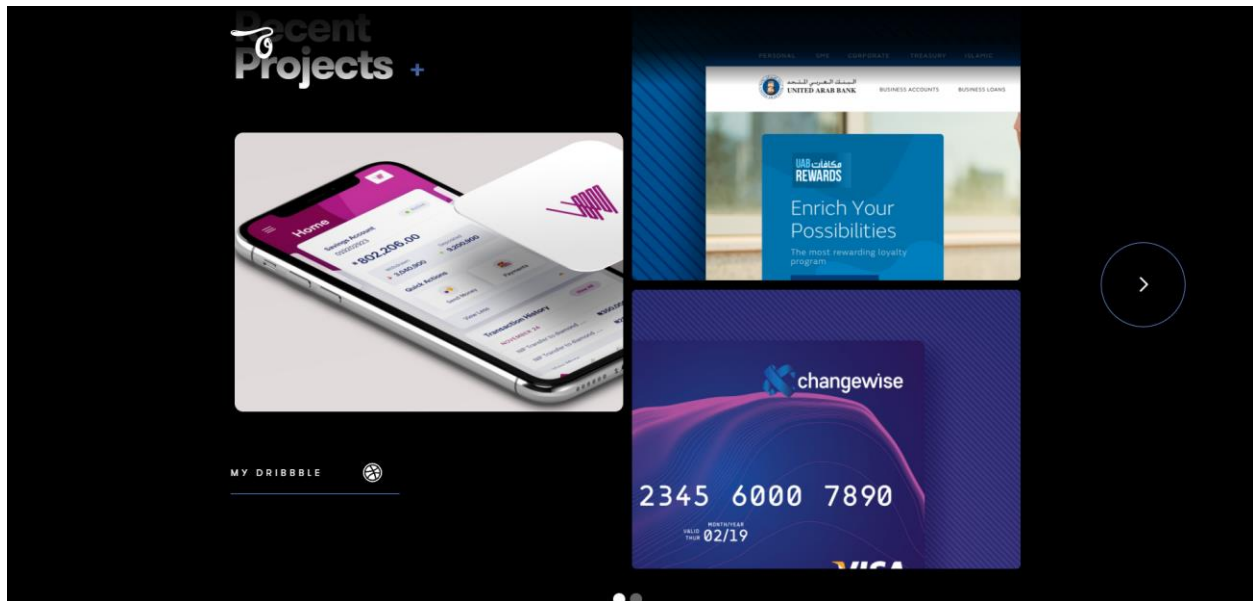

I like the design because if you first open the webpage the picture of the creator pops up and the background is very simple, and it looks elegant.

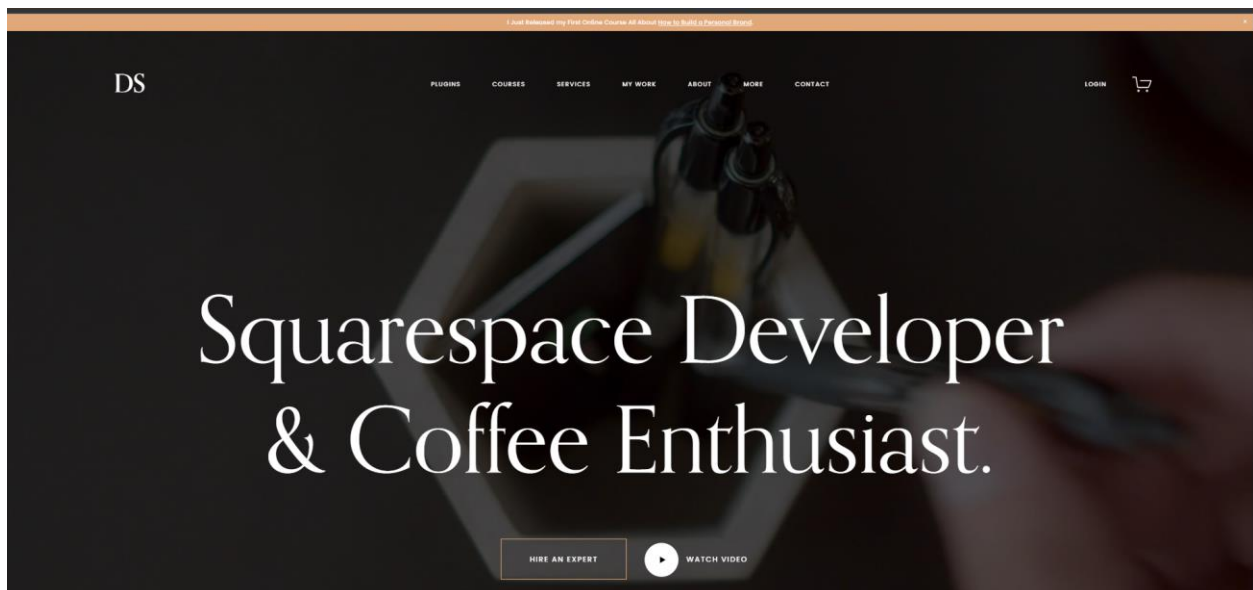

The picture of the microscope goes well with the background and the on each text there Is a background image of the number of paragraph there are.
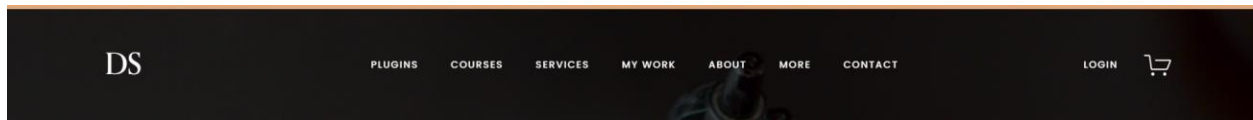

Here, I like that you can press on the arrow key and it slides to the next contant.

Second Example

Url of the website: https://devonstank.com/

The navigation Bar on this website is very clean and easy to navigate and I like that these a video attach to the main page which gives an brief explanation of what the creator does

If you hover on the "Courses", "Services" , "More" a pop up comes and the animation for that is very well designed and I would like to use this feature on my website.

Third Example

Url of the website: https://www.kantwon.com/

This about page looks fun and stand out for every other website and the artwork is amazing, it gives a short description of what he does and what are his credentials. This is a cool and innovative design and every color goes well with each other.
